Areas of Activities

IT sector

Request

SPARKreators

As a continuation of the robot donation project, each year we organize a robotics league to encourage children and teachers to use donated equipment. SPARKreators league is organized the third year in the row, and this year the final competition will be held at Mostar, unlike the previous years when the competition was organized in regional centres. We want to organize an event and national competition for children from the schools included in the project.

Cooperation Offered
